Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a method of extending the life span of a subject comprising administering an inhibitor of histone deacetylase (e.g., butyric acid), classified in class 514, subclass 557.
- II. Claims 12 and 15-22, drawn to a method for identifying a molecular alteration in a subject comprising administering an inhibitor or histone deacetylase, classified in class 800, subclass 278.
- III. Claims 13 and 15-22, drawn to a method of identifying a test molecule that induces a molecular alteration, classified in class 800, subclass 278.
- IV. Claim 14, drawn to a method for identifying a molecule which extends the life span of a subject, classified in class 424, subclass 9.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, functions and effects. For example, the method of Group I is the administration of a compound to extend the life span, using a known compound, while Group II uses a known compound for identifying a molecular alteration, (e.g., a identification method, not a treatment method), while Group III identifies a test molecule or unknown that induces a molecular alteration, while Group IV identifies a molecule which extends the life span of a subject.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Species Election

This application contains claims directed to the following patentably distinct species of the claimed invention: 1) a specific inhibitor of histone deacetylase (e.g., butyric acid) and/or 2) a species

Art Unit: 1616

modification of molecular alteration (e.g., the specific molecular alteration must be named, such as, mRNA encoding cytochrome P450). Note 1 and 2 must be elected for Groups II and III, while only 1 must be elected if Groups I or IV are elected.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 12-14 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
